FOREIGN PRIORITY

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Korea on 02/15/2003 and 11/13/2003. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

ALLOWABLE SUBJECT MATTER

Claims 3 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claim. None of the references of record teaches or suggests the waveguide dimensions which are recited in these claims.

102 REJECTIONS

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1,2, 4-9, and 11-13 are rejected under 35 U.S.C. 102(a) and (e) as being anticipated by Garito et. al., U.S. Patent Application Publication No. U.S. 2003/0123828A1.

Garito et. al. teaches (Fig.8) a polymeric optical device and method of making same comprising a plurality of layers including a substrate 310, upper/lower cladding layers 320 with embedded waveguide and upper sub-cladding layers 432,430 including polyimide polymer materials in which the layers are formed by conventional buffer layers/masking/etching techniques in which the layers including the cladding sub-layers are chosen to reduce polarization dependence or birefringence, which clearly, fully meets Applicant's claimed limitations.

The following references are also cited by the Examiner as being pertinent prior art: Chen et. al., U.S. Patent application Publication No. U.S. 2004/0067022A1 (Figs.1-9), Eggleton et. al., U.S.P. No. 6,782,148

112 REJECTIONS

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 8 are labeled as "A polymeric device (or method of making same)", however the body of the claim, (i.e. after the words "comprising") fails to particularly point out which of the layers are made of polymeric material. Dependent claims 2-7 and 9-13 are inclusive of the limitations of the rejected claims and are also rejected.

A copy of PTO-1449 will be included in this office action.

The following references are also cited by the Examiner as being pertinent prior art: Lee et. al., U.S. Patent Application Publication No. U.S. 2004/0213535A1 (Note entire document), Eggleton et. al., U.S. 6,782,148 (Figs.1-9b) and Chen et. al., U.S. Patent Application Publication No. U.S. 2004/0067022A1 (Figs.1-9).
